PROJECT'S

Senioren Application : Senioren is an Android application This app is especially useful for senior citizen and has easy accessibility. Senioren application is based on Image Processing scanning barcode of any Medicine. It shows the details of the medi-cine and aslo help to know for what purpose its used. It also have an option to set dosage alarms manually. It also has a special feature where an individuals can get help with any issues in "ChatBox" option.

Online Job Recruitment : This project is based on web portals. it has two main feature that helps any individuals to find his desired job and also helps a company to find an employee according to the company's requirement. A person can fill his details, skills and CV and apply to the job he/she wants. Similarly, a company shall post job title which can be seen to a person seeking for a job.

E-commerce Website : In this project , i have used Php and Mysql to make the "Home Decor" website. It has two option Register and Login. All the products are shown under the home decor and as well as on the website. User can search any product he/she wants and can add to the cart. Also, there is no payment option in this project (proceed to checkout).
